Use + Share + Adapt

{ Content the copyright holder, author, or law permits you to use, share and adapt. }

Public Domain – Government: Works that are produced by the U.S. Government. (17 USC § 105)

Public Domain – Expired: Works that are no longer protected due to an expired copyright term.

Public Domain – Self Dedicated: Works that a copyright holder has dedicated to the public domain.

Creative Commons – Zero Waiver

Creative Commons – Attribution License

Creative Commons – Attribution Share Alike License

Creative Commons – Attribution Noncommercial License

Creative Commons – Attribution Noncommercial Share Alike License

GNU – Free Documentation License

Make Your Own Assessment

{ Content Open.Michigan believes can be used, shared, and adapted because it is ineligible for copyright. }

Public Domain – Ineligible: Works that are ineligible for copyright protection in the U.S. (17 USC § 102(b)) *laws in your jurisdiction may differ

{ Content Open.Michigan has used under a Fair Use determination. }

Fair Use: Use of works that is determined to be Fair consistent with the U.S. Copyright Act. (17 USC § 107) *laws in your jurisdiction may differ

Our determination **DOES NOT** mean that all uses of this 3rd-party content are Fair Uses and we **DO NOT** guarantee that your use of the content is Fair.

To use this content you should **do your own independent analysis** to determine whether or not your use will be Fair.

Learning Objects for

CH216

Grace Winschel

**Dr. Ginger Shultz
Renata Everett**

Identified Best Learning Objects

- Excellent for review, visualizations and theory
 - [University of Alberta IR Spectroscopy Tutorial](#)
 - [University of Alberta NMR Spectroscopy Tutorial](#)

We Need More Practice!

Identification of Organic Compounds Using IR and $^1\text{H-NMR}$ Spectroscopy

The following infrared and proton NMR spectra provide a good introduction to the use of these techniques for identifying organic compounds and their structures. The top spectra are IR and the bottom spectra are $^1\text{H-NMR}$. Based on the spectra and the given molecular formula, write the structure of each compound.

Compound 1, $\text{C}_{10}\text{H}_{14}\text{O}$

We Need More Practice!

- Practice is GREAT.
- These can be improved.
- No information is given regarding to HOW to solve these problems.
- No explanations accompany answers.

Jing Wrappers!

Help to guide problem solving!

What About Student-Run Discussions?

- Students teaching other students how to understand spectroscopy is great on every level.
- Can we use new online learning objects to facilitate discussions about spectroscopy?

Voice Thread.

- Upload difficult problems and have students make their own interpretations of what the spectra may indicate.
 - Extra GSI points for insights and good chemical intuition shown in the thread?

Implementation

- Using Sitemaker to make a comprehensive website full of our new wrapped learning objects.
- Install LOs in Renata and Gracie's lab sections.
- Assign certain LOs and collect work.
 - Work will not be graded.
- Continue developing technique-based LOs for the winter term.

Other Ideas

- Include a repository of optional LOs on our Sitemaker site for additional practice
 - Carry over topics from 211 for refreshers
 - Include advanced references for topics covered
 - Endless amounts of practice problems

Other Ideas

Thank You!
