Other Inflammatory Arthritides

December 2, 2009

Seetha Monrad M.D.
Division of Rheumatology
Department of Internal Medicine

Learning Objectives

1. List the common features of seronegative spondyloarthropathies, and how they differ from rheumatoid arthritis
2. Describe the cardinal clinical and radiographic features of ankylosing spondylitis
3. Describe the distinguishing features of psoriatic arthritis, IBD-associated arthritis and reactive arthritis
4. Understand the association of HLA-B27 with spondyloarthropathies, and why it is not commonly used clinically
5. List the risk factors for septic arthritis
6. Describe the presentation, diagnosis and management of septic arthritis
7. Describe the presentation of gonococcal arthritis, and how it differs from other types of bacterial arthritis
8. Know the spectrum of microbes that can cause infectious arthritis
