1. WA State Board for Community & Technical Colleges, [Technical Writing](#) [http://www.oercommons.org/courses/technical-writing-engl-235, http://cnx.org/content/m41511/latest/]
Notes: Type: Course; Found Using: OERCommons.org

Description: Discussions and assignments in this class reveal methods for developing the writing skills and techniques needed to communicate effectively and efficiently in professional and technical industries. The course explores techniques for gathering, organizing, and presenting technical information in written reports for technical and non-technical readers. By studying the purpose and design of reports commonly used in business and technical industries, students will gain practical writing experience and stronger persuasive skills, which will also be useful in academic writing. Students work will focus on writing reports, memorandums, and other business and technical documents with an emphasis on layout, tone, clarity, and conciseness. Course includes instruction in research technique, research paper formatting, and academic documentation, culminating in a formal report on a technical topic.

2. Massachusetts Institute of Technology, [Introduction to Technical Communication: Explorations in Scientific and Technical Writing](#) [http://ocw.mit.edu/courses/writing-and-humanistic-studies/21w-732-5-introduction-to-technical-communication-explorations-in-scientific-and-technical-writing-fall-2006/]
Notes: Type: Course; Found Using: OERCommons.org

Description: This course is designed to help you develop skills that will enable you to produce clear and effective scientific and technical documents. We will focus on basic principles of good writing-which scientific and technical writing shares with other forms of writing-and on types of documents common in scientific and technical fields and organizations. While the emphasis will be on writing, oral communication of scientific and technical information will form an important component of the course, as well.

5. The Cain Project In Engineering And Professional Communication, [A Guide to Writing a Comparison Assessment Report](#) [http://cnx.org/content/m17128/latest/]
Notes: Type: Article; Found Using: OERCommons.org

Description: This guide may be used in preparing reports in which a client or manager has requested a comparison of equipment or other solutions. The guide may also assist in preparing the Flowmeter Report for the Rice University Mechanical Engineering Laboratory in Heat Transfer, Thermodynamics, and Engine Cycles (MECH 431).

8. The Cain Project In Engineering And Professional Communication, [Copyright and Electronic Publishing: Citation](http://cnx.org/content/m15914/latest/) [http://cnx.org/content/m15914/latest/]

Notes: Type: Article; Found Using: OERCommons.org

Description: This document focuses on why and how electronic sources must be cited so that students can avoid plagiarism. Because students now routinely use readily available electronic sources for their papers, they must learn how to properly cite them. You will have more complete coverage of plagiarism issues if you use an attorney.

13. Saylor.org, [Engineering Communication](http://www.saylor.org/courses/me304/) [http://www.saylor.org/courses/me304/]

Notes: Type: Course; Found Using: Saylor.org

Description: Effective communication is essential to teamwork, and teamwork is essential to accomplishing complex engineering work. In this course, you will learn several aspects of effective technical communication that will help prepare you to work successfully on an engineering team. The strategies and techniques learned here are also applicable to other situations?for example, preparing a résumé and cover letter, conducting a successful job interview, negotiating to make a major purchase or sale, and navigating through legal situations that you might encounter.

Terms of Use: Various, see course page

14. WA State Board for Community & Technical Colleges, [Research for the 21st Century](http://cnx.org/content/m41515/latest/) [http://cnx.org/content/m41515/latest/, http://www.oercommons.org/courses/research-for-the-21st-century-libr-180]

Notes: Type: Course; Found Using: OERCommons.org

Description: Upon completion of this course, students will be able to: develop and research a topic of global significance; recognize authors' arguments and the political, social and economic motivations behind their work; demonstrate the ability to locate, interpret and cite the relevant and appropriate information resources on a topic; and, demonstrate an understanding of the information research process.

22. WA State Board for Community & Technical Colleges, [English Composition I](http://www.oercommons.org/courses/english-composition-i-engl-101) [http://www.oercommons.org/courses/english-composition-i-engl-101, <http://cnx.org/content/m41476/latest/>]

Notes: Type: Course; Found Using: OERCommons.org

Description: English 101 focuses on the analysis of basic human issues as presented in literature with an emphasis on analytic reading, writing and discussion, and on development of argumentative essays based on textual analysis, with attention to style, audience and documentation. By writing several analytical, thesis-driven essays which show engagement with and understanding of a variety of texts, students will practice the critical thinking, reading and writing skills which comprise an important component of college and university studies as well as clear, audience-appropriate communications in other professional settings. This class is comprised of a series of three units, each of which is centered around an essay assignment. For each unit, in addition to the essay itself, you'll be asked to respond to reading assignments and to complete exploratory writing assignments. You'll do a lot of reading and writing, and your instructor will ask you to respond to ideas from our texts, from specific assignments, and from each other.

23. WA State Board for Community & Technical Colleges, [English Composition II](http://www.oercommons.org/courses/english-composition-ii-engl-102) [http://www.oercommons.org/courses/english-composition-ii-engl-102, <http://cnx.org/content/m41506/latest/>]

Notes: Type: Course; Found Using: OERCommons.org

Description: This is an expository writing course requiring more advanced writing skills than Basic English Composition 101, yet reviewing and incorporating some of the same skills. This course teaches you research skills by emphasizing the development of advanced analytical/critical reading skills, proficiency in investigative research, and the writing of expository and persuasive prose including properly documented and researched argumentative essays. A major component of this course will be an emphasis on the research process or ?information literacy?: your ability to locate, evaluate and use information effectively. You also will recognize academic audiences, increase your clarity and objectivity, and adhere to standard formats.
