

## Suggested Readings and Ethics Resources

### Suggested Readings:

Ketefian, S. & Norris, D. (2002). The recent revision of the code of ethics for nurses with interpretive statements (American Nurses Association). *Research & Theory for Nursing Practice*, 16(4):219-221.

Ketefian S. (2001). The challenge for nursing research: scientific integrity. *International Journal of Nursing Practice*, 7(4):227-228.

### Resources on Research Policies and Human Subject Protection:

1. Extensive resources are available at the U.S. Government website, which students are invited to explore, choosing the specific headings and topics of interest to them, keeping in mind that the guidance they provide applies only to research supported by U.S. Government agencies. It is customary, however, for institutions to require compliance with these regulations for **all** research that is undertaken in their institutions. The websites are as follows:

<http://www.hhs.gov/ohrp/>

<http://www.hhs.gov/ohrp/policy/index.html>

[http://www.hhs.gov/ohrp/assurances/assurances\\_index.html](http://www.hhs.gov/ohrp/assurances/assurances_index.html)

<http://www.hhs.gov/ohrp/international/HSPCompilation.pdf>

2. A document that addresses a wider range of issues in research and scientific integrity is provided by the **Guidelines for Scientific Integrity**, by the Midwest Nursing Research Society, Second Edition (2002), which can be accessed and download from:

<http://www.mnrs.org> [click Resources]

3. In addition, those who can access the University of Michigan website, they are invited to explore the research policies that prevail at the University of Michigan by going to the research website, as follows:

<http://www.research.umich.edu/hrpp/index.html>
