Exercise: Quiz Game (This activity is optional, depending on time)

We shall use the 'Quiz Game' to revise key principles of disaster response and management. In the Quiz Game, we give you an answer and you tell us the question

Procedure:

- We shall give you an answer on an issue in any of the topics we have covered so far
- Your role is to tell us the corresponding question
- We shall divide ourselves into two groups
- In order to be organised, each group should agree on one person who will raise their hand whenever the group is ready with a response
- The first group to put up their hand gets the chance to answer
 - o If they get it correct, they get 200 Marks
 - o If they get it wrong, the group loses 100 Marks
 - o If they get it halfway, the group gets only 50 Marks

Challenges:

	Answer	Question
0.	It is a threatening or potentially damaging incident	
1.	A fire extinguisher with this colour code most probably contains pressurized carbon-dioxide	
2.	This class of disasters are a result of man's activities including construction and conflict	
3.	Disaster Risk is given by Hazard X Vulnerability – Capacity	
4.	They often cause death, injuries, loss of clean water and deterioration in hygiene	
5.	Actions that result in persons knowing what to	

	do and how to respond after a disaster has occurred	
6.	These are decisions and actions taken after a disaster, including immediate relief and reconstruction	
7.	These are activities designed to provide permanent protection from the effects of a disaster and include engineering and protective measures	
8.	This international framework that emphasises early warning, capacity building, safety, resilience of communities and risk reduction at all levels	
9.	It refers to susceptibility of communities and critical infrastructure to the negative effects of a disaster	
10.	Examples of these epidemics include avian influenza, SARS and Ebola	
11.	We do this by ensuring that resources are available to cope with a threat and to resist the impact of a hazard	
12.	It is the occurrence of a health related event in excess of what is expected in a particular community in a given period of time	
13.	A French term meaning 'pick and sort' or 'select and categorise'. It involves classifying victims in order to assign priorities for urgency of case handling	
14.	People with this code need to be given the first priority at the accident scene	
15.	It is assessed by checking for the radial pulse or capillary refill	
16.	Its characteristics include violence, massive displacement, administrative and political collapse and worsening of civil differences	
17.	It is assessed by determining if a patient can follow simple commands	
18.	This class of fire involves combustible gases such as methane, propane and butane which can produce explosions	
19.	A meeting point of first responders such as fire engines, ambulance and fire fighters	
20.	We do this by removing people from an area of danger to a safe assembly point, in an orderly manner
