

4.4 Management plan on Eclampsia (10 min)

In Learning Unit 2.3, you have started with the creation of a management plan. Your management plan should already include the management of gestational hypertension and preeclampsia. In this learning activity, we ask you to continue with the management plan, by adding a new chapter about eclampsia. Use your answers to the questions in Learning Unit 4.3 as a basis for this chapter. Next to these drug treatment considerations, also write down your management concerning:

- Emergency measures for convulsions
- Laboratory tests
- Delivery considerations
- Postpartum medications
