Maternal and Child Health, Community and Mental Health, Basic Studies and Surgical Nursing

Learning objectives for the course or programme:

To improve counselling and interviewing techniques

Suggested topics or keywords related to this topic:

To improve counselling and interviewing techniques

Intended Learner Audience:

Undergraduate

Types of Materials:

Courses

Case Studies

Lab Exercises

Lecture Presentations

If other, please provide details below

Other Types of Materials:

Simulations/Animations, Standardized Patient Case

Additional comments that would aid our search:

During discussion, representatives from five departments at KCN all identified the difficulty of training student nurses to effectively counsel and interview patients. The root of the problem lies in the large number of students and limited time available

Name: andryn2006

Institution:

SAIDE

Country:

South Africa

[RE: MATERNAL AND CHILD HEALTH, COMMUNITY AND MENTAL HEALTH, BASI \(/COMMENT/1#COMMENT-1\)](#)

For mental health: In 2009, a visiting professor at Kwame Nkrumah University of Science and Technology (KNUST) put together a great interactive, multimedia-based module on a mental state exam: <http://www.oerafrica.org/healthproject/ProjectResources/tabid/976/mct/D...> (<http://www.oerafrica.org/healthproject/ProjectResources/tabid/976/mct/Details/id/37520/Default.aspx>). It includes several example scenarios between a psychology and 3 student actors pretending to be patients with various symptoms and mental illnesses. For maternal and child health: University of Ghana and KNUST developed a number of HTML-based multimedia modules for obstetrics and gynaecology, including basic obstetrics exam, Caesarean Section, Episiotomy, and Total Abdominal Hysterectomy. There is also a gynaecology textbook from University of Cape Town. All of these are available from the Health Resources page: <http://www.oerafrica.org/healthoer/HealthOERHome/HealthResources/tabid/2...> (<http://www.oerafrica.org/healthoer/HealthOERHome/HealthResources/tabid/274/Default.aspx>). We'll soon be posting 5 new gynaecology videos from the University of Ghana. For surgical nursing, I'm not quite sure of the overlap between surgical nursing and surgical specialties in medicine. University of Ghana just completed 5 surgery modules - which includes basic guidelines and history taking. We'll be posting those later this week. I will reply once they have been posted.

The 6 surgery modules from University of Ghana that I mentioned yesterday are now up at <http://open.umich.edu/education/med/oernetwork/med/surgery> (<http://open.umich.edu/education/med/oernetwork/med/surgery>).
