Hi Clive, Several of us from OER Africa and University of Michigan searched a number of health OER repositories for relevant material. You didn't specify the topics, so we tried to focus on the intended audience and look for comprehensive, media-rich resources. Here's a result of our initial scan:

<https://docs.google.com/document/d/1GRpY-vn1Rerw8U9wlQB4kcLDy3c7dEho30C7...> (https://docs.google.com/document/d/1GRpY-vn1Rerw8U9wlQB4kcLDy3c7dEho30C73xP-zGE/edit?hl=en_US) (publicly viewable). Let us know if any of these resources are helpful as well as if you have additional search criteria to help us better tailor our search. -Kathleen 

Hi Kathleen, Many, many thanks to you and your colleagues for all your efforts in searching and finding the huge selection of content! I have had a quick look at some of the content and yes, it is very helpful. Unfortunately, my original request did not appear in full. One very important point that did not appear is the need for copyright-free material, where only excerpts will be used, for proof of concept. Once again thank you for your great support! Best regards, Clive

Clive, that's a great question. I'll admit I used short-hand for the licenses in the Google Doc. All of the materials that are listed in the Google Doc are either copyright-free (public domain) or licensed in a way that you can download them, modify them, and redistribute them (usually Creative Commons, often abbreviated as CC). All of the materials listed in the Google Doc fall into one of five licensing groups: 1. Public Domain - It is no longer copyrighted. You can do whatever you want with it. 2. CC BY - Creative Commons Attribution License - Others may copy, distribute, display, modify the work as long as the author(s) is attributed/named 3. CC BY NC - Creative Commons Attribution Noncommercial License - Others may copy, distribute, display, modify the work as long as the author(s) is named and it is not for commercial purposes. 4. CC BY

SA - Creative Commons Attribution Share-Alike License - Others may copy, distribute, display, modify the work as long as the author(s) is named and any modification use the identical license 5. CC BY NC SA - Creative Commons Attribution Noncommercial Share-Alike License - Others may copy, distribute, display, modify the work as long as the author(s) is named, it is not for commercial purposes, and any modifications use the identical license. There is an overview of the Creative Commons licenses at <http://www.oerafrica.org/CreativeCommonslicensechoices/tabid/1793/Default...> (<http://www.oerafrica.org/CreativeCommonslicensechoices/tabid/1793/Default.aspx>). I hope that's helpful.
