1. I learn best when I:

- know the big picture first.
- get hints.
- use verbal resources.
- follow the procedure.
- do it myself.

2. If I were solving clinical questions:

- try to develop an over-all idea.
- look for hints or help when stuck.
- rely on verbal resources.
- like to figure out the best way.
- solve alone.

3. When sitting in the lecture:

- like to have an overview first.
- like the hints and help for questions.
- need to verbalize concepts.
- learn on my own pace.
- learn by myself.

4. When studying anatomy:

- like a map linking all the topics.
- like the hints and help.
- need to verbalize the concepts.
- follow my own pace to learn.
- study it myself.

5. When doing the practice quizzes, I prefer:

- prefer questions testing on details.
- to figure it out myself.
- questions with text only.
- to try the quizzes just for hard topics.
- to alone.

6. In anatomy class I best liked:

- thorough details.
- examples to help solve problems.
- freedom to learn at my own pace.
- working alone.
- holistic information.
- solving problems by myself.
- constructing ideas from visuals.
- a clear course learning plan.
- working with partners.

7. When using a computer 3D model I:

- focus on the different views showing spatial relationships.
- learn how to use it from hints and help.
- focus on the details of a part.
- include it in a learning procedure.
- use it when studying alone.

8. When thinking about work:

- I think of the big picture.
- I enjoy finding solutions for myself.
- I like verbal resources.
- I like to work on personal plan.
- I like the details of pieces.
- I enjoy help/hints from others.
- I like visual resources.
- I like a given plan and schedule.
- I brainstorm with a friend.

9. When I'm not sure what to do I:

- find more details.
- look for hints or help.
- organize information verbally.
- need a suggested plan.
- try to get the big picture.
- persist until I get it.
- visualize information.
- decide a start point for myself.
- work with a friend.

10. When working with a new computer program, I:

- try a part of it first.
- follow the hint or help.
- prefer reading documents to learn.
- use instructions only when I need them.
- look at the entire program.
- stick to it until I figure it out.
- prefer a tutorial with screen shots.
- go through all the instructions.
- work with a friend.

11. I'm good at:

- linking the ideas together.
- persevering at problems.
- verbalizing things.
- adjusting a plan to my needs.
- working alone.
- starting form the big picture.
- learning through hints and help.
- visualizing things.
- following a predefined plan.
- working in a group.

12. I'm best described as:

- a global thinker.
- a bulldog with a problem.
- a visual person.
- a practitioner of delivered plans.
- a loner.
- someone who pieces problems together.
- working best with help.
- a verbal person.
- a planner for myself.
- a friend and helper.

13. When time is important I:

- quickly solve a part of the problem.
- look for hints or help.
- look at visual resources to help me.
- work on my plan.
- outline the whole problem.
- solve it myself.
- read text resources to help me.
- stick to the procedure.
- work alone.
- work with others.

14. I am good at memorizing:

- holistic ideas.
- my own way.
- ideas presented visually.
- information I re-organized.
- detailed information of an idea.
- with hints and help.
- ideas presented verbally.
- structured information.
- ideas developed with others.
